Connecticut OER Grant Program Announcement

The Connecticut Open Educational Resources Coordinating Council is pleased to announce the return of the Connecticut Open Educational Resources Grant Program to continue the support of Connecticut Higher education institutions' efforts to increase access, affordability, and achievement for students through the incorporation of open educational resources (OER). The grant program focuses on OER opportunities in "high impact" areas - courses with high enrollment and high textbook costs for which high-quality OER already exists.

For complete information about the grant and to submit a proposal, visit: <http://bit.ly/oergrant2021>

Completed application forms are **due by 11:59pm on February 15, 2021.**
